| ABSTRACT

Herhofer Space group brings a game-changer opportunity into the world of share-holding, unlike the existing companies/institutions where their original IPO uses exchanges like New York Stock Exchange, DAX, etc. Herhofer group makes available its share in cryptocurrency on its dedicated blockchain. Herhofer Net Worth Cryptocurrency and shares are backed by 65 patents in Space. Our Space is designed and dedicated to a private research institute named Herhofer Space Research Institute. It provides BSc, MSc, Ph.D. education. Most of the basic information is found on our website.

At present, we aim to open an office in Chelsea, London, and provide education in the same location. Starting acceptance date is next year.

Educational programs are in **gshsri.com**; Herhofer Space University in four colleges provides our research programs.

HSUC Celeste - Space Science.

HSUC Atlantis - Space construction, orbital construction dock, spacecraft, cyber civilization, plasma engines, plasma compressed metal fuel.

HSUC Black - Crypto science.

HSUC Temple - Space finance

Also, our Herhofer Net worth is backed by our 65 patents in Space, fashion, weapons, cyber, and total asset price 36 digits of length.

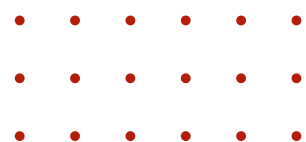

| INTRODUCTION

While Elon Musk is a billionaire and his bank account of 9 trillion is 12 digits, the patents backing Herhofer Space Group is a total of 700 digits worth of Space patents and fare estimate for the near future 36 digits.

That large number is not sellable on regular IPO equities market exchanges. It is the new functionality solving our selling ability to use the equity exchanges.

THE OVERALL CONCEPT

Cryptocurrency and smart contract platforms such as Bitcoin and Ethereum have sparked considerable interest and have become promising solutions for electronic payments, decentralized applications, and potential digital stores of value.

However, when compared to their centralized counterparts in key metrics, the current state of affairs suggests that present public blockchain exhibit severe limitations (which is one of the inspirations to build our own blockchain), particularly with respect to scalability, hindering their mainstream adoption and delaying public use.

In fact, it has proved extremely challenging to deal with the current engineering boundaries imposed by the trade-offs in the blockchain trilemma paradigm. As a result, several solutions have been proposed, but few of them have shown significant and viable outcomes.

Thus, in order to solve the scalability problem, a complete rethinking of public blockchain infrastructures was required.

Herhofer Net Worth space would create its blockchain, which would deal with or minimize the above challenges. Here is the process with which Herhofer Net Worth solve scalability challenge:

- Full decentralization - Dispensing with the requirement for any confided in an outsider, thus eliminating any weak link;
- Powerful security - Permitting secure exchanges and forestalling any assaults dependent on known assault vectors;

- High versatility - Empowering the organization to accomplish execution essentially equivalent to the concentrated partner, as estimated in TPS;
- Productivity - Playing out all organization administrations with negligible energy and computational prerequisites;
- Bootstrapping and capacity upgrade - Guaranteeing a cutthroat expense for information stockpiling and synchronization;
- Cross-chain interoperability - Upheld by configuration, allowing limitless correspondence with outside administrations.

Starting from the above challenges, we've created Herhofer Net Worth as a complete rethinking of public blockchain infrastructure, specifically designed to be secure, efficient, scalable, and interoperable. Herhofer Net Worth's main contribution rests on two cornerstone building blocks:

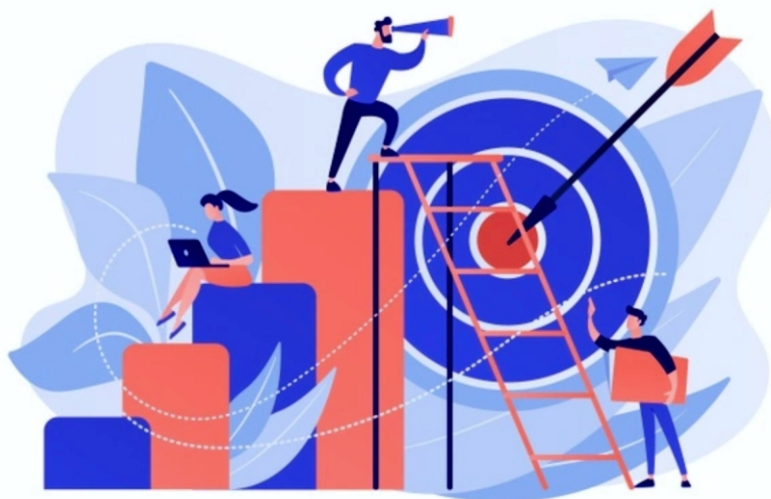

- A certifiable State Sharding approach: successfully dividing the blockchain and record state into various shards, dealt with in equal by various taking part validators;
- Secure Confirmation of Stake agreement instrument: a further developed variety of Proof of Stake (PoS) guarantees long-haul security and appropriated reasonableness while disposing of the requirement for energy-serious PoW calculations.

Vision

The vision is to release the current frozen 700 digits price of patents and make shares buyable by adding the functionality of normal Ltd company Initial Public Offering process.

The Herhofer Net Worth Crypto is the currency used to initiate shares selling of Space Dedicated group, Herhofer Space Group, where the original IPO of any company requires use exchanges like New York Stock Exchange, DAX, etc. HNWC will not use exchanges to sell shares of 700 digit patent assets backed by bank account.

Mission

Herhofer Space Group aimed to solve the unsellable 36 digits company asset where patents assets have infinite price digits of length, just with Solving Fitch's Paradox Of Knowability and breaking the knowledge barrier.

The currency goal is replacing common share-holding and adding features of shares, student loans, repayments, payments, and all typical university and banking functions in addition to shares and share management.

ABOUT US

Our logo

Our logo means an infinity of knowability. We stand to be the World First Infinite Asset Herhofer Space Group shares.

Website	www.gshsri.com
Project Name	Herhofer Space Research Institute
Symbol	\$HNWC
Decimal	

WHY INVEST WITH US

The Herhofer Net Worth Cryptocurrency and shares are backed by 65 patents in Space, space construction, space fashion, space perfumeries, space leisure, space research institute, space maths, spacecraft construction, space weapons industry, space plasma engine, space plasma reactors, space cold fusion process, space orbital construction socks, space nuclear reactors, and building spacecraft in nuclear submarine construction docks and assemble.

In orbital construction docks, building spacecraft career in aircraft carrier dry docks and assemble in orbital spacecraft carrier construction docks, first spacecraft carrier patent, plasma blast 15,000,000 C arming spacecraft railguns, cyber magnetic pipe, lightsaber 3000000 C cold cutting blade, and much more space industry of Herhofer Space Group.

OUR SCOPE

Herhofer Net Worth, ICO White paper, introducing fundamentals of inventing Pre-IPO, IPO, stocks market, equities, and derivatives exchanges. We are launching our fundamental change in the cryptocurrency market, inventing, introducing and replacing Pre-IPO, IPO, stocks, equities, and derivatives in the crypto market. We launch a collection of blockchains, and this is our first blockchain Herhofer Net Worth cryptocurrency allowing fundamentals of Pre-IPO of Herhofer Space Group.

OUR MARKETING STRATEGY

Leverage our Social Media presence and extensive network within the Entertainment Community to onboard Advocates & Ambassadors that will be dedicated to promoting the token. Our Brand Ambassadors already include you and everyone that trusts our projects.

Regular AMAs and meet-and-greets with our Ambassadors (investors) to bridge the gap between the space & Crypto communities.

Invest in widespread crypto-marketing on Telegram, Reddit, Twitter, Discord, Medium, YouTube & Facebook.

PR & Media Outreach - \$HNWC is not only an exciting token but a token of firsts. The first-and-only Entertainment token created by the Entertainment Industry for the Entertainment Industry. The first long-term solution for payments within the

Entertainment Industry. The first Entertainment token to launch with integration onto established platforms in the space. If that news isn't worthy, then what is?!

The very first project that promoted and supported researchers.

This project also serves as a way to support the student by providing the loan that aids them to achieve their dreams and desire.

Email Marketing – We currently boast a database of over a hundred and thousands of Entertainment Platform users that we will use to amplify the noise surrounding \$HNWC.

Airdrop Campaigns – Incentivize more of the community to join and promote \$HNWC.

Functionality

Staking

Loan creation

Trading and Exchange

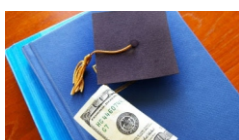

Buying, Selling, and Transfer

Deposit and Withdrawal

Other features include

Research load

Student loan and payment

Student loan planning

Coin Utility

The currency would be “**Bitcoin Fork**,” going with the name Herhofer Net Worth Crypto (HNWC). This is going to serve as our Herhofer Space Research Institute and Ph.D. research.

The Blockchain native currency will be “\$HNWC,” which will serve a variety of purposes, such as:

Pool Rewards: \$HNWC will be used as an incentive to power our pool rewards system. \$HNWC holders will be able to take a share from the pool fee rewards.

Governance Functions: Users who hold \$HNWC will be able to control and vote on the development and community decisions related to our Space.

This makes our Platform easy for the people as \$HNWC holders make vital decisions and submit new proposals while keeping control over their funds.

Staking Rewards: \$HNWC will be used to reward liquidity providers. Yield Farmers and Lending Providers would also be able to receive \$HNWC. Herhofer's Net Worth Crypto Margin trading system will be powered by the \$HNWC as well.

Staking Fees: All Herhofer Net Worth Crypto products related to staking. Fees in such products will be collected in \$HNWC

Trading Fee Rewards: \$HNWC holders will enjoy a share from trading fees and coin exchanges.

Other Incentives: Herhofer Net Worth Crypto will be governed by the people (users who hold \$HNWC), making it fair for the people to enjoy various benefits. People deserve to earn dividend rewards through various incentives, which will help grow and develop the Herhofer Net Worth Crypto Ecosystem.

BENCHMARK FOR AN IN-WORLD ECONOMY

Herhofer Net Worth's value proposition to researchers and users is that they can fully capitalize on the economic interactions between their works and users. To allow those economic interactions, the platform must allow three things to be traded: currency, goods, and services (Herhofer Net Worth has a clear patent).

Yes, talking about the patents, we can only mention just a few by type perhaps, which we have; orbital dock spacecraft construction, orbital dock spacecraft carrier construction, plasma engines, metal W50 fuel compression, Plasma blasts, lightsabre 3000000C cold cutting blade, space cyber civilization, Martian open atmosphere leisure centre, Martian Air rebreather, Martian Open Space Fitness, Martian Open atmosphere fashion and fitness line, Martian Open atmosphere perfumery, sun-protective cremes, and Martian sunglasses, Open Spacesuit with a transparent metal face protector and light disperse face protection tin t-shirt, space weapons industries, British Space Program and Level Up, more workplaces.

Herhofer Net Worth will integrate a core system that allows global, instant, and cost-effective payments between any two users on the internet. Cryptocurrencies allow for trustless payment channels to be established between parties, with low-trust hub-and-spoke systems already possible. For services to be provided on Herhofer space, we are developing a system that enables researchers to program the interactions between them and their research. This system runs exclusively on the client-side but allows for different data flow models: from mere local effects and traditional configuration (this student can leverage) to complex and complicated phases on the same channel.

Everyone within our ecosystem will benefit from the availability of fast, cheap micropayments, scalability, decentralized storage, loans, payment,

plus withdrawal, and other features enabled by the advent of cryptographic techniques employed while designing the Herhofer space group share cryptoblockchain.

To foster the exchange of new technology, economic incentives must be in place to ensure the continued creation and distribution of items and techs. In addition, because static content can be arbitrarily copied, the user experience should empower social agreements that recognize original creations and content.

By implementing an identity system to establish authorship or real ownership. Users will be able to track and verify an owner's consent through cryptographic signatures. These experiments are already happening; the Herhofer space group share cryptoblockchain.

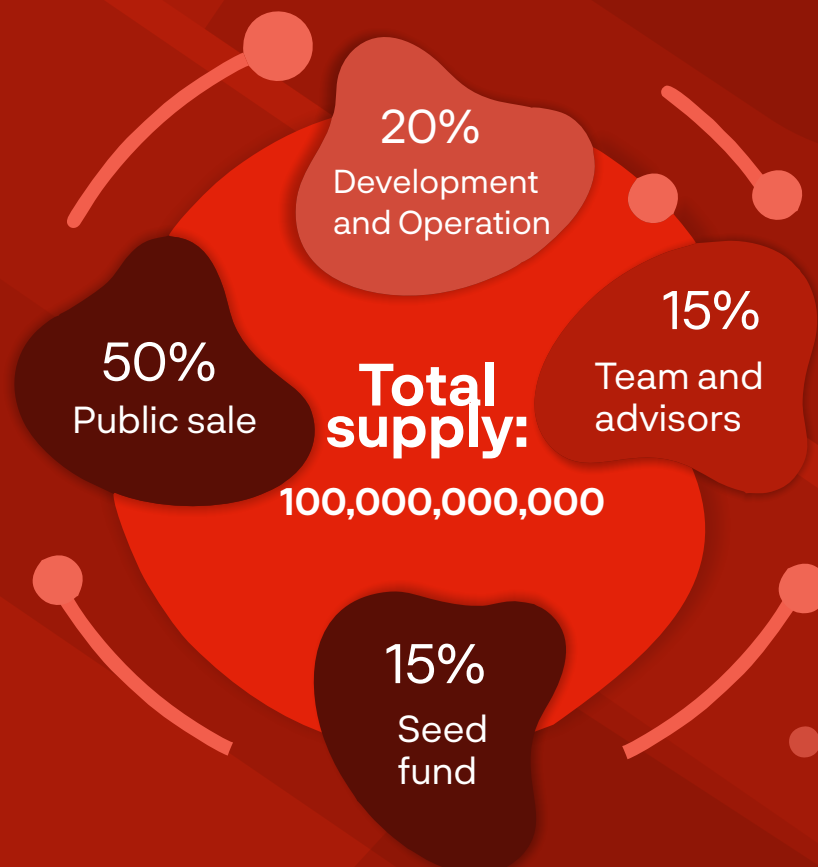

\$HNWC Tokenomics

The maximum supply of Herhofer Net Worth Crypto will be “100,000,000,000” \$HNWC spread across our chain. The distribution allotment is done to benefit from decentralization and to help the Herhofer Net Worth Crypto products gain traction and adoption more quickly.

From the introduction of our smart contract, a portion of the team token allotment will be released each month for a total of 24 months. This will make it easier for the Herhofer Net Worth Crypto team to work diligently to ensure that all suggested features are implemented and that early dumping is avoided. Anyone with high-quality abilities can join the HNC team at any time, again in the spirit of fairness.

\$HNWC Distribution

Total supply: 100,000,000,000

Coin Information

The Herhofer Space group will allow all interested investors to buy shares using the \$HNWC. Instructions for coin procurement will be announced before the date of public sales. Based on our commitment to our business and financial plan, we have decided to release;
Limited supply of; Affix amount

\$HNWC— price will be \$0.027

Symbol: \$HNWC

Hard Cap: \$6,000,000

Coin Soft Cap: \$5,000,000

Max Potential Supply: 100,000,000,000

\$HNWC for Sale: 50,000,000,000

Private Coin Sale Date:

Public Coin Sale Date:

ROADMAP

The Herfofer space group is working earnestly to ensure the smooth running of their Space institution and profitable returns for all the shareholders. Below is our roadmap.

2022 Q1

Launching of the Herfofer Space Institute website

2022 Q2

Creation of the \$HNWC and the blockchain network build-up

2022 Q3

Smart contract deployment and App development

2022 Q4

Private coin sales

Conclusion

The typical long and overly detailed whitepaper is not written here. Rather than overly written futuristic features that will never materialize, you should see the features firsthand. We want to deliver results, not just make promises.

Many, many thanks to you. Let's make this a reality. Everyone has access to the Herhofer Net Worth Crypto. Why not let send it to where it belongs? We need you as much as you need us to grow.
